

B<sup>1</sup> Furthermore, the composition may contain a light stabilizer, and examples thereof include hindered amines and [bensotriazoles] benzotriazoles serving as radical scavengers. The composition may also contain a pigment selected from among ordinary organic and inorganic pigments suitable for olefins. If necessary, the composition may also include a lubricant selected from among metal salts of fatty acids, and/or a filler such as calcium carbonate or talc.

**IN THE CLAIMS:**

Please amend claims 8 and 34 as follows:

B<sup>2</sup> 8. (Amended) The thermoplastic elastomer composition according to claim 6 wherein the light stabilizer is one of a hindered amine and a [bensotriazole] benzotriazole.

NOT ENTERED 34. (Amended) The thermoplastic elastomer composition according to claim 32 wherein the light stabilizer is one of a hindered amine and a [bensotriazole] benzotriazole.

**REMARKS**

Applicant is submitting a non-executed Reissue Application Declaration to overcome the defects alleged by the Examiner. More specifically, the Declaration claims the same foreign priority as the original patent. Additionally, the language required in paragraph 4 of the Action is included.
